

LIQUID GLASS EDITION

PipBud Design System

Verified meritocracy platform. True-black surfaces, Liquid Glass depth and a single violet signal color for the PipBud Web, iOS PWA and Android ecosystem.

RELEASE

v3.0.0 Liquid Glass

SUPERSEDES

v2.4.0 Institutional

CLASSIFICATION

Production Standard

ISSUED

October 2026

ENGINE

Next.js 15+ / Tailwind / Django 5

TARGET

Web / iOS PWA / Android

VERIFICATION

Cryptographic Trade Ledger

01 · DESIGN DIRECTION

Black canvas. Glass depth. One violet signal.

v3.0 replaces the warm ember/bone palette with a true-black, OLED-first interface in the spirit of X, layered with Liquid Glass materials so every surface feels like a native, modern app.

PRINCIPLE	IMPLEMENTATION	IMPACT
1. True black first	Canvas is #000000, not charcoal. Content floats on it; glass layers carry the depth. Maximum contrast, minimal eye strain through London/New York overlaps and lower power draw on OLED.	Cleaner feed density. Cards read as light, not boxes.
2. Liquid Glass depth	Translucent, blurred, specular-edged surfaces over live content. Used for navigation, sheets, cards and active controls, never for body text backgrounds without a scrim.	Spatial hierarchy: what floats is actionable.
3. Violet is a signal	#8B5CF6 appears on at most ~10% of any screen: active state, primary action, verified marks. Everything else is neutral.	Brand is recognisable at a glance and never noisy.
4. Modern app feel	44pt touch targets, floating bottom dock, bottom sheets, spring motion, haptic confirmation on audited actions, edge-to-edge layouts with safe-area awareness.	Feels native on iOS PWA and Android.
5. Zero fluff (retained)	Institutional, terse copy. No tutorials, no hand-holding, no vanity metrics. Reputation is minted from audited executions only.	High information velocity.

What changes from v2.4

ELEMENT	V2.4	V3.0
Canvas	#0C0A09 Obsidian	#000000 True Black
Brand color	#C2410C Ember	#8B5CF6 Violet (glow #A78BFA)
Card surface	#1C1917 solid stone	Liquid Glass, white 4–8% over black, blur + specular edge
Light surfaces	#FAF9F9 warm bone cards	Removed. Dark-only; journal paper becomes midnight glass
Borders	#E7E5E4 / #44403C	#2F3336 hairline + rgba(255,255,255,.12) glass edge
Mobile dock	Flat glass bar, 5 pills	Floating Liquid Glass capsule with violet active lens
Tier palette	Level 5/7 ember gold + flame	Re-keyed so violet stays exclusive to brand; L7 uses violet-to-ice
Logo	Text wordmark	New P-bud mark on a glass tile, plus wordmark lockups

02 · BRAND MARK

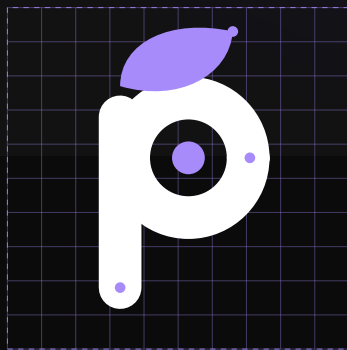

The P-Bud mark

A geometric P built from one stem and one ring. The ring holds a pip, the smallest unit of price movement. A bud rises from the stem: verified skill, grown from audited trades.

Primary mark · glass tile

CONSTRUCTION

Bud

Ring

Stem

Stroke 12.5% of mark width · round caps

WORDMARK

PipBud

Inter / SF Pro Display Bold, tracking -2%. 'Pip' in white, 'Bud' in Violet 400 (#A78BFA). Never set in lowercase or re-color the split.

Wordmark baseline aligns to tile center-line

Lockups

PipBud

HORIZONTAL

PipBud

STACKED

MARK ONLY

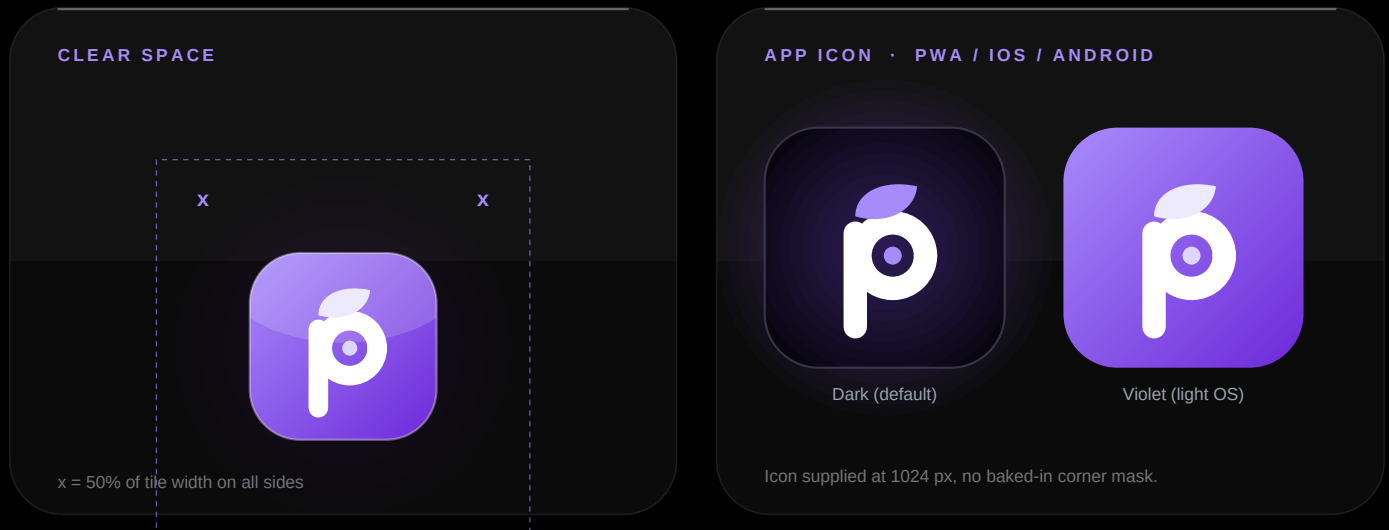

ON VIOLET

02 · BRAND MARK

Clear space & app icon

The mark needs room to read as glass. Keep the clearance below on every surface.

Sizing & surface rules

RULE	STANDARD
Minimum size	Tile 24 px (digital) / 8 mm (print). Mark only 16 px. Below 24 px use the mark without the glass highlight.
Approved backgrounds	True black #000000, glass over black, violet #8B5CF6 to #6D28D9 gradient. Mono white mark on any photo with $\geq 4.5:1$ contrast.
Mono versions	Single-color white or black, pip and bud inherit the color. Used for favicons, stamps, watermarks and embossing.
Motion	Splash: stem draws up (180 ms), ring sweeps 360 deg (320 ms), bud scales in with spring (260 ms), pip pulses once.

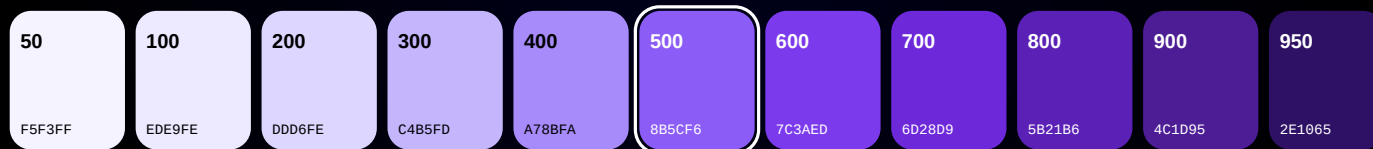

Never

- Re-color the tile outside the violet gradient or place it on busy imagery.
- Stretch, rotate, outline, add drop shadows or swap the ring for another shape.
- Redraw the bud, detach it from the stem or use the old text-only wordmark.
- Place the glass tile on a light surface. The product is dark-only.

03 · COLOR TOKENS

Black with traces of violet

Violet 500 is the only brand hue. Use Violet 400 for small text and icons on black (7.7:1); Violet 500 holds 5:1 and is for fills, large text and borders.

pipbud-violet-500 = brand · pipbud-violet-400 = glow / small text · pipbud-violet-700 = gradient end

Surfaces, text & structure

TOKEN	VALUE	ROLE
☐ pipbud-black	#000000	App canvas, modal backdrop, status bar
☐ pipbud-bg-1	#0A0A0B	Solid fallback for glass when blur is unsupported
☐ pipbud-bg-2	#101012	Sunken inputs, code blocks, table zebra
☐ pipbud-bg-3	#16161A	Pressed state of solid rows
☒ pipbud-text-1	#E7E9EA	Primary text, numbers, headings
☐ pipbud-text-2	#71767B	Secondary text, timestamps, captions
☐ pipbud-border	#2F3336	1 px structural hairline on solid surfaces
☐ pipbud-glass-edge	rgba(255, 255, 255, .12)	Border of every glass layer; specular top edge .35

Semantic & data colors

● Profit / Win #22C55E Positive P&L, WIN pills, rule compliance	● Loss / Breach #F43F5E Negative P&L, stop-loss, drawdown breach	● Warning #F59E0B Approaching risk limit, pending audit	● Info #38BDF8 Neutral system status, sync progress
---	--	--	--

Signature gradients

BRAND #A78BFA > #6D28D9 Primary CTA, logo tile, FAB	AURORA #7C3AED > #2E1065 Hero backdrops, profile headers	SOVEREIGN #8B5CF6 > #F5F3FF Level 7 ring and border only
---	--	--

04 · TYPOGRAPHY

Sans for interface. Mono for the ledger.

Inter / SF Pro Display carries navigation and prose. JetBrains Mono / SF Mono carries every number, price, lot size and ticket id so columns align vertically. Sizes are px/pt at 1x and scale with Dynamic Type.

DISPLAY

Sans 34 / Bold 700
-0.03em / 38 · Landing hero, profile name

Rules

- Every numeric value, including inside prose, is set in Mono with tabular figures. Currency symbol stays in Sans-weight parity.
- Right-align numeric columns. P&L sign is always explicit (+ / -) and colored green / rose.
- Max two weights per screen. Body copy never below 13 px on mobile; ledger telemetry never below 11 px.
- Fonts are system-first: SF Pro on Apple, Roboto-compatible Inter on Android/Web, with JetBrains Mono self-hosted for tabular data.

05 · MATERIAL SYSTEM

Liquid Glass

Four materials, each a recipe of fill, blur, saturation, edge and shadow. Glass is for what floats and can be acted on. It always sits over content or the aurora backdrop, never over flat white.

Anatomy of a glass layer

LAYER	SPECIFICATION
1 Backdrop	backdrop-filter: blur(n) saturate(s). Content behind must stay legible; add a 0.55 black scrim under text-heavy glass.
2 Fill	Translucent white (or ink for thick). Never a gradient fill; sheen is a separate top-half overlay at 3.5% white.
3 Specular edge	1 px top inner highlight rgba(255,255,255,.35) fading to 0 at 40% of height, plus 0.6 px outer edge at the material's edge value.
4 Depth	Shadow 0 8 32 rgba(0,0,0,.60). Raised layers add a violet bloom rgba(139,92,246,.18) only when active.
5 Lensing	On press: scale 1.02, specular highlight tracks the touch point, spring 280 stiffness / 22 damping. Release returns in 220 ms.

CSS token reference

```
.glass-regular { background: rgba(255,255,255,.07); backdrop-filter: blur(24px) saturate(160%);
border: 1px solid rgba(255,255,255,.14); box-shadow: inset 0 1px 0 rgba(255,255,255,.35), 0 8px 32px rgba(0,0,0,.6); }
.glass-violet { background: rgba(139,92,246,.18); border-color: rgba(167,139,250,.45); }
@supports not (backdrop-filter: blur(1px)) { .glass-* { background: #0A0A0B; } } /* + prefers-reduced-transparency */
```

06 · PROGRESSION

The 7-level meritocracy ladder

Criteria and privileges are unchanged from v2.4. Only the visual language is re-keyed for a black canvas, with violet reserved for the brand and the Level 7 Sovereign ring.

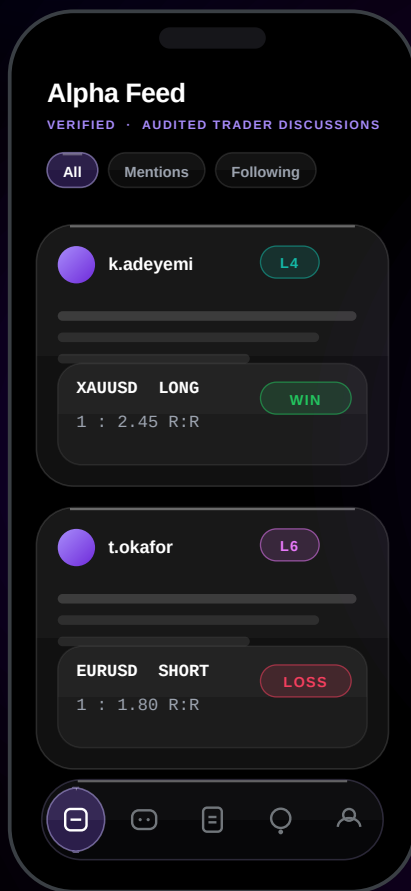

TIER	AUDITED CRITERIA	PRIVILEGES UNLOCKED
 L1 Market Explorer Slate #A1A1AA	Broker API connected or 5 manually verified trades logged.	Read-only Community Feed, standard journaling.
 L2 Discipline Apprentice Signal Blue #60A5FA	20+ trades logged; Rule Compliance Rate >= 80%.	Post creation in Feed; comment replies.
 L3 Consistent Operator Jade #22C55E	50+ trades; expectancy > 0.2R per trade; Max DD < 8%.	Trader Forum messages; screenshot attachments.
 L4 Risk Sentinel Teal #14B8A6	100+ trades; Sharpe > 1.25; zero rule-breach liquidations.	Public profile verification mark; priority feed placement.
 L5 Capital Allocator Amber Gold #F59E0B	Passed prop firm challenge certificate or audited \$50K+ live capital.	Pinned strategy threads; verified P&L ledger sharing.
 L6 Market Maestro Orchid #E879F9	250+ audited trades over 6+ months; Profit Factor >= 1.85.	Mentor badge; private high-frequency channel; strategy syndication.
 L7 Institutional Sovereign Violet to Ice #8B5CF6 > #F5F3FF	Top 0.5% global alpha rank; \$250K+ verified capital; Sortino > 2.2.	Institutional Desk status; signal broadcasting; VIP forum badge.

Badges render only from server-audited execution logs. Rings are non-interactive visual states; tapping a badge opens the audited criteria sheet (glass-thick).

07 · APP INTERFACE

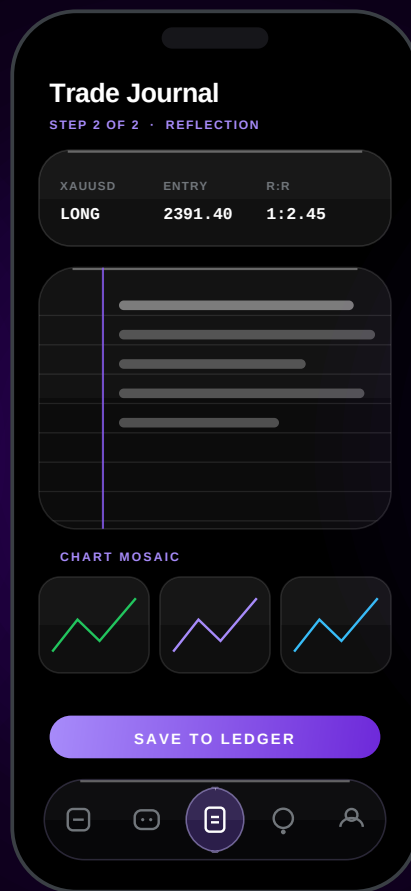

The new look in context

Feed, dual-telemetry Journal studio and verified Profile on the floating Liquid Glass dock.

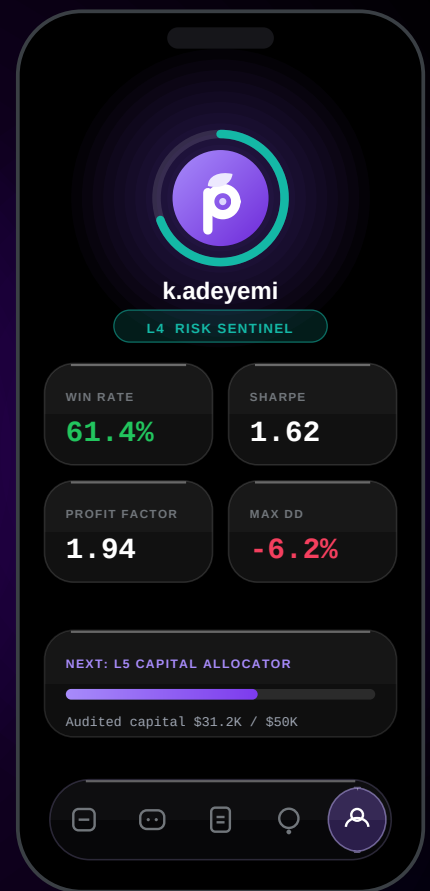

Verified Alpha Feed

Glass-regular cards, violet active chip, tier pill, ledger telemetry.

Dual-telemetry Journal

Locked execution metrics above a midnight ruled canvas with violet margin line.

Verified Profile

Level ring tracks progress to the next audited tier.

08 · COMPONENT STANDARDS

Behavior and ergonomics

Functional behavior carries over from v2.4. Visual treatment moves to Liquid Glass.

COMPONENT	BEHAVIOR & CONSTRAINTS
A Floating dock	Fixed capsule, 24 px above the home indicator, glass-thick. Exactly 5 destinations: Feed, Forum, Journal, Notifications, Profile. Active item gets a glass-violet lens. Settings opens from Profile. Hides on scroll down, returns on scroll up.
B Journal studio	Step 1 locks hard metrics: Pair, Direction, Entry, Exit, SL, TP, Lots. Step 2 opens the midnight ruled canvas with a violet margin line at 24 px for reflection. Multi-image chart mosaic with instant lightbox. Deep link <code>/journal/log?tradeId=[id]</code> adds notes to Telegram-logged trades.
C Feed & threads	Every post card, headline and preview navigates to <code>/community/post/[id]</code> . Dedicated thread view for deep reply chains and trade telemetry. Avatar and author tags route to <code>/profile/[username]</code> .
D Forum messaging	6 px row padding, compact timestamp and author badge. <code>@username</code> is parsed into a clickable glass-violet pill linking to the profile. <code>@Mentions</code> fire <code>chat_tag</code> notifications plus Web Push and Telegram. Feed replies push to post authors.
E Notification hub	Dedicated page with tabs for Mentions, Feed Replies and Audited Trade Alerts. One-time native Web Push permission banner (glass-thick, one-tap registration).
F Buttons & inputs	Primary: brand gradient pill, 48 px high, white label. Secondary: glass-regular. Destructive: glass with rose edge. Inputs: bg-2 with glass edge, violet focus ring 2 px at 60%.

Motion & haptics

TOPIC	STANDARD
Spring	Default spring: stiffness 280, damping 22. Sheets 340 / 30. No linear easing on movable layers.
Durations	Micro 120 ms · Standard 220 ms · Sheet 340 ms · Splash 760 ms.
Haptics	Light on tab change, medium on trade logged, success on audit verified or tier unlocked.
Accessibility	Respect reduced motion and reduced transparency (solid bg-1 fallback). 44 pt minimum targets. Text over glass >= 4.5:1.

09 · VOICE, ROUTING, ROLLOUT

Institutional tone. Unchanged routes.

CONTEXT	REJECTED	APPROVED
Trade log header	Welcome to your journal! Keep track of all your trades.	Trade Execution Ledger
R:R indicator	Risk-to-reward is how much you risk versus reward. Aim for 1:2!	1 : 2.45 R:R
Sync	Don't worry, we protect your data. Upload your statement now.	Drop MT4/MT5 statement (.csv, .html) or PDF.
Community feed	Check out what your fellow traders think! Be nice.	Verified Alpha Feed · Audited Trader Discussions
Settings	Click here to change your account settings or manage alerts.	Account Preferences & Desk Configuration

Routing architecture (unchanged)

HOST	EXPERIENCE	NEXT.JS ROUTING
pipbuds.com	Marketing landing page: value proposition, tier ladder, Launch App CTA. Uses the new aurora hero and glass tile.	src/app/page.tsx standalone landing.
app.pipbuds.com	Decoupled web app and trading terminal: Feed, Journal, Forum, Profiles, Settings.	middleware.ts rewrites / to /feed.

Implementation checklist

- Tokens** Replace ember/stone/bone tokens in tailwind.config with the v3.0 violet scale, neutrals, semantic and glass tokens (page 5, 7).
- Canvas** Set html/body and app shell to #000000. Remove all light surfaces and bone journal paper.
- Glass utilities** Add .glass-ultrathin / regular / thick / violet utilities with @supports and reduced-transparency fallbacks.
- Logo & icons** Export tile SVG, mark-only SVG and 1024 px PWA icons; update manifest.json, favicon, apple-touch-icon and splash.
- Dock & journal** Rebuild the mobile dock as the floating capsule; restyle the journal canvas as midnight ruled glass.
- Tier badges** Swap tier palette to page 8; add the Level 7 violet-to-ice ring. Criteria logic is untouched.
- QA** Contrast audit on glass, 120 Hz scroll with blur on mid-range Android, Safari PWA backdrop-filter checks.
